

UVision strengthens its presence in the United States

UVision USA has signed a cooperation agreement with MAG Aerospace, to support US Forces in the operation of HERO Loitering Munitions.

Under the agreement, MAG Aerospace will provide Operators, FSRs, Training and local support for the HERO systems exclusively for UVision USA.

October 18, 2021 - UVision USA - continues to strengthen its operations in the US with the signing of a cooperation agreement with MAG Aerospace at the AUSA (Association of the United States Army) Annual Meeting.

Through this cooperation, UVision USA and MAG Aerospace will offer operational and training solutions for the Hero family of loitering munitions. MAG Aerospace will provide in-country resources, perform demonstrations, operational training, and support for UVision's customers OCONUS (outside Continental US) and CONUS (Continental US).

"This agreement has come about in response to the growing need in the United States for HERO systems," says Jim Truxel, CEO of UVision USA. "As part of the cooperation with MAG Aerospace, we will be able to provide local support for the company's customers locally and around the globe. UVision USA operations will continue to expand."

"MAG Aerospace brings a terrific reputation and demonstrated experience in providing similar services all over the world," says Chief Growth Officer, Matt Bartlett, of MAG Aerospace. "Together with UVision's advanced technological knowledge and its operationally-proven systems, we will be able to provide an operational advantage to American forces operating on and off the continent."

The agreement was signed by Jim Truxel and Joe Fluett, CEO of MAG Aerospace, during the AUSA Annual Meeting on October 12.

About the HERO family

The HERO family of loitering munitions comprises several models. Designed for different missions, from short-to-medium and long ranges and flight times using various warheads, the Hero series of high-precision loitering munitions provides operational forces with combined intelligence, surveillance, reconnaissance (ISR) and strike capabilities, enabling them to independently locate, track and engage time-sensitive, low-signature targets. These advanced munitions can loiter in the air in a clandestine manner for an extended period of time; locate and track the enemy; help to validate targets; and carry out a precise strike. The Hero system can abort an attack in mid-air, re-enter loitering mode, and then resume the attack, or re-assign

targets, thus minimizing collateral damage and providing operational forces with unsurpassed tactical flexibility on the modern battlefield.

About UVision Air Ltd.

UVision designs and manufactures combat-proven smart loitering munition systems, providing military organizations around the globe with precise and effective operational attack capabilities. Its innovative, cost-effective systems are based on cutting-edge technology and 30 years of extensive field experience by military professionals, engineers, and the company's own management team.

In early 2019, UVision Air Ltd. established UVision USA Corporation, which will produce the HERO series of loitering munitions in the United States, beginning in mid-2022. The establishment of UVision USA further strengthens UVision's overall commitment to the US Armed Forces and the US economy.

The HERO series of systems provides high-precision strike capabilities, based on unique aerodynamic platform configurations. UVision's loitering munitions are designed with unique flight qualities for precision-attack munitions, integrating advanced airborne guidance and sophisticated navigation algorithms, integrated with C4I stations – thereby meeting the requirements of today's modern battlefield challenges for combat in complex and dynamic environments.

The units are operationally deployed and field proven. ISO certified, UVision is fully committed to providing turnkey solutions to its extensive network of partners and customers around the world, with high-quality service and swift support.
