

## **UVision invests in SpearUAV, becoming a shareholder in the company**

***This investment is another step in the expansion of UVision into the unmanned systems market***

**May 11, 2022** UVision Air Ltd. - a global leader in aerial loitering munition systems of all sizes for a variety of missions revealed its strategic investment in SpearUAV, who have developed an autonomous, AI-based technology for encapsulated SWARM-based UASs.

The two companies will work to share their technological knowledge: UVision with its proven knowledge and experience in loitering munition systems, and Spear with its expertise in AI based tactical drones for ISTAR missions. The synergy between the companies will make it possible to offer a comprehensive solution for varying operational needs from the micro-tactical forces and brigade level, to the division level.

"This investment in Spear comes as a direct continuation of the company's expansion in the international defense market," says Major General (Ret.) Avi Mizrachi, CEO of UVision. "Just recently, UVision was selected by the U.S. Marines to provide its advanced loitering munition system, Hero-120, as part of a multi-year installation for all armored vehicles. Spear offers a unique ISTAR solution that can be easily deployed by any soldier in the field. Together, we are creating a broad-spectrum solution, tailored to any operational need of our customers - at sea, in the air and on land."

"We are pleased and proud of our strong partnership with UVision," says Colonel (Ret.) Gadi Kuperman, Founder & CEO of SpearUAV. "UVision has recognized the enormous potential of Spear's robust, intuitive, and autonomous solutions for immediate, aerial superiority, in both the defense and HLS markets. While Spear continues to thrive and grow independently, we are confident that this collaboration will bring with it a breakthrough into new markets for the two companies."

At MDM show (May 10-12) UVision Hero Loitering Munitions and SPEAR UAVs will be displayed at UVision stand #1025

### **About UVision Air Ltd.**

UVision designs and manufactures combat-proven smart loitering munition systems, providing military organizations around the globe with precise and effective operational attack capabilities. Its innovative, cost-effective systems are based on cutting-edge technology and 30 years of extensive field experience by military professionals, engineers, and the company's own management team.

UVision's loitering munitions are designed with unique flight qualities for precision-attack munitions, integrating advanced airborne guidance and sophisticated navigation algorithms, integrated with C4I stations – thereby meeting the requirements of today's modern battlefield

for combat in complex and dynamic environments. Based on unique aerodynamic platform configurations, the HERO series of loitering munitions systems provides high-precision strike capabilities, suitable for tactical and strategic targets – whether for short, medium or long-range – utilizing a variety of warheads to ensure maximum mission effectiveness. The units are operationally deployed and field-proven.

ISO certified, UVision is fully committed to providing turnkey solutions to its extensive network of partners and customers around the world, with high-quality service and swift support.

### **About SpearUAV**

Spear, an Israel based technology company, active since 2017 in the development and manufacturing of unmanned systems for Defense and HLS applications.

Spear is a single source supplier for several Israeli MOD programs, providing military clients, organizations, and governments around the globe with robust, autonomous, AI-based aerial systems.

With civilian and military backgrounds, the Spear team brings multidisciplinary expertise in areas including: drone development, aerospace, AI & AR, military explosives, SWARM operation and more.

The Ninox family of encapsulated UASs are instantly launched and intuitively operated, providing on-demand and on-the-move capabilities that are combat proven, and can be launched individual and swarm configurations. Delivering instant ISTAR missions and aerial loitering munition for precision-attack capabilities, empowering individual warfighters, and equipping manned & unmanned vehicles, and allied systems, with a new aerial dimension that suits today's urban battlefield.
